YUKON BUREAU OF STATISTICS

Population Report
June 2015

Highlights:

- The estimated population of Yukon in June 2015 was 37,343; an increase of 92, or 0.2%, compared to the figure for June 2014 (37,251).
- Comparing June 2015 to June 2005, Yukon's estimated population increased by 6,121, or 19.6%. The population of the Whitehorse area increased by 5,264, or 22.3%; Dawson City increased by 241, or 13.2%; and Watson Lake decreased by 53, or 3.5%.

Notes on methodological changes: Prior to 2012, the Yukon Bureau of Statistics produced population figures twice a year. Effective 2012, figures are produced quarterly.

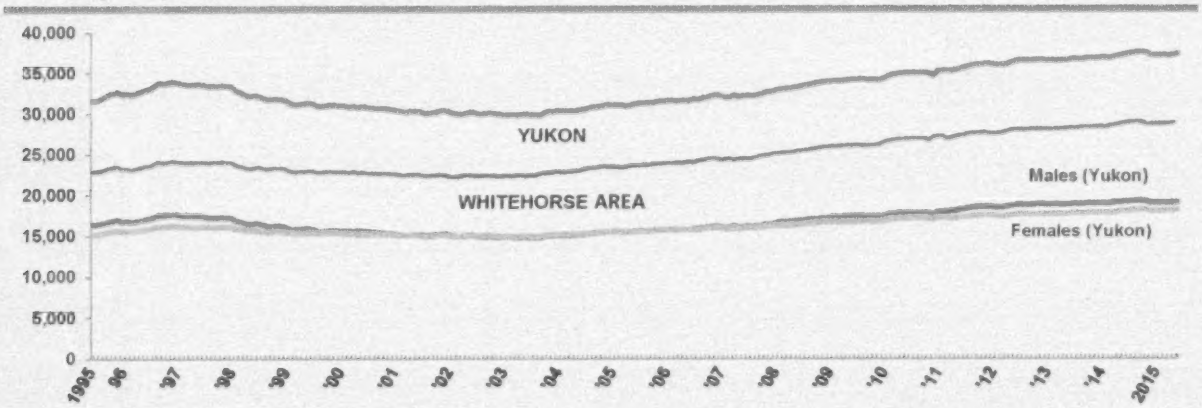
Official population counts prior to June 2010 were based on information in Yukon Health Care Insurance Plan (YHCIP) files and a semi-annual health care update survey that estimated the number of plan members who were no longer Yukon residents. In 2010, the estimation model was revised and the population counts for June 2010 through December 2014 were derived by tracking changes in YHCIP files and other administrative data files. In 2015, the model was further revised to make the approach more comprehensive and to improve accuracy based on information in all available and applicable administrative data files of the Yukon government. In addition, the total population count of April 2011 was calibrated to a census-based estimate adjusted for net undercoverage.

The new model assigns residents of unorganized areas to their nearest communities. Estimates for Whitehorse now include population in surrounding areas *as well as in Marsh Lake* to remain comparable with the geographical area defined by Statistics Canada as the Whitehorse Census Agglomeration.

All monthly estimates are as of the last day of the month. The June estimates represent annual figures.

Due to the change in methodology in 2015, figures presented in this publication for the period from April 2011 to December 2014 are not strictly comparable to figures prior to the period. Revised population estimates for First Nations will be published in the September 2015 Population Report.

Monthly Population, June 1995 to June 2015



- Yukon's population declined steadily from 1997 to 2001, and then fluctuated around 30,000 from 2001 to 2003.
- From 2004 through 2014, the population increased almost steadily with successive record highs[1] in most quarters. However, during the last quarter of 2014, the population decreased by almost 400.
- The June 2015 population for Yukon was 37,343, an increase of 165 people compared to the March 2015 figure of 37,178. Compared to the June 2014 figure (37,251), the June 2015 population increased by 92 people, or 0.2%.

[1] Accurate population counts during the Gold Rush are not available. However, the first Census population figure for Yukon was 27,219 in 1901.

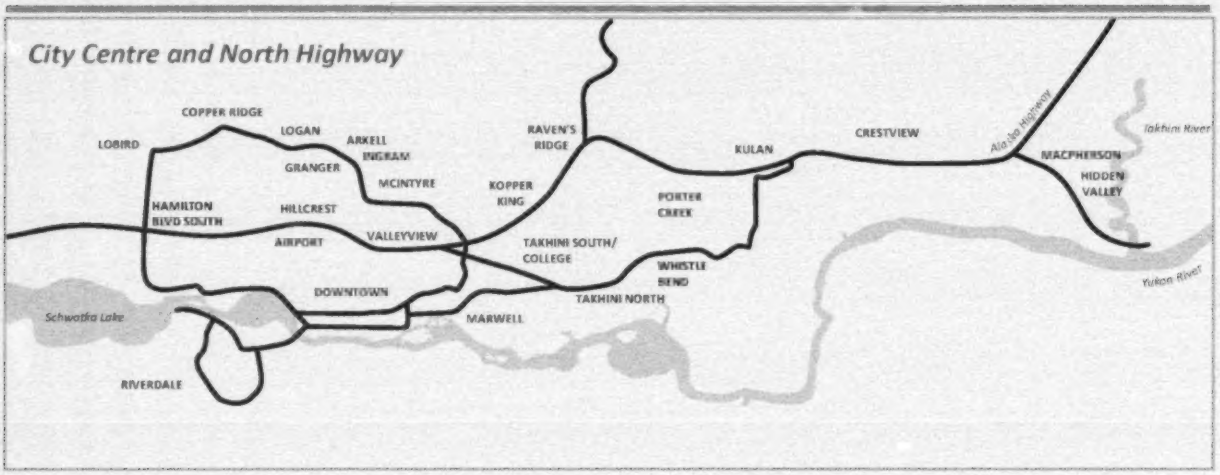
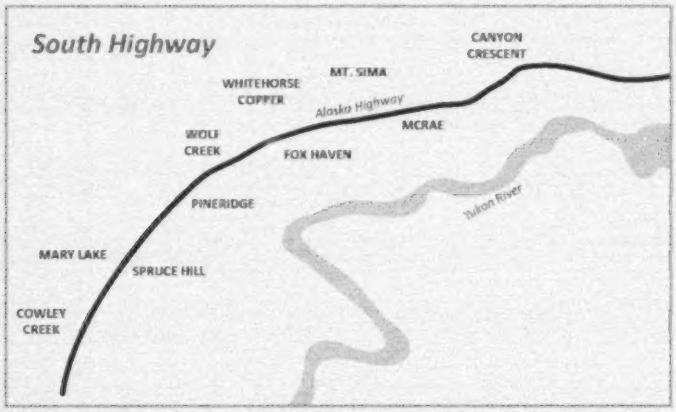
Population by Whitehorse Area





Note: Residents of Whitehorse area are assigned to subdivisions based on their addresses in various administrative files. Some addresses in these files appear inconsistent or incomplete. Efforts have been made to resolve any apparent inconsistency or incompleteness of information by validating the information against multiple sources.

Changes in subdivision populations from one time period to another are not only due to natural population change and migrations, but may also be due to reassignments of previously inaccurate addresses on file.
